About this catalogue

Each entry below describes the scope of a service, the audience it is designed for, and the web page where full details are available. Links in this document are active. To discuss any service, book a consultation using the link or QR code on the final page.

Fees depend on the scope of each engagement and are confirmed in writing after an initial consultation. All work is carried out in line with accepted standards of research and publication ethics; authorship and responsibility for submitted work remain with the researcher.

I Research and Publication Support

Systematic Review and Meta-Analysis · Manuscript Development and Publication Guidance · Biostatistics and Data Analysis · Thesis and Dissertation Guidance · Research Proposals, Grants and Policy Briefs · Clinical Research, Ethics and GCP Support · Research Automation and Digital Health Tools

II Training and Capacity Building

Faculty and Student Development Programmes · Hands-on Systematic Review Workshop · Systematic Review and Meta-Analysis Certification Course · Systematic Review Masterclass · Research Internship Programme

III Institutional Services

Institutional Research Partnerships · Journal Setup, Training and Hosting (OJS)

IV Research Platforms and Resources

AI SRMA Suite · Meta-Analysis Online · SRMA Library · URN Membership · UJHSE — Utkarsh Journal of Health Sciences and Environment · Research Resources

V Engagement process and consultation

Research and Publication Support

Methodological and analytical support across the research cycle, delivered by public-health researchers who publish in peer-reviewed journals themselves.

URN-R01

Systematic Review and Meta-Analysis

End-to-end evidence synthesis conducted to Cochrane methodology and reported to PRISMA 2020.

- Research question framing (PICO/PECO) and protocol development
- PROSPERO registration support
- Search strategies for PubMed, Scopus, Embase, Web of Science and CINAHL
- Screening, data extraction, risk-of-bias and GRADE certainty assessment
- Meta-analysis, subgroup and sensitivity analysis in R, Stata and RevMan

Suitable for: Faculty, clinicians, doctoral scholars and research departments

utkarshresearchnetwork.in/book-service.php →

URN-R02

Manuscript Development and Publication Guidance

Preparation of original research for submission to reputable, indexed peer-reviewed journals.

- Structuring and scientific editing of the manuscript
- Compliance with reporting guidelines (CONSORT, STROBE, PRISMA, COREQ)
- Target-journal selection, with screening for predatory outlets
- Cover letters and point-by-point responses to reviewers

Suitable for: Researchers preparing a first or subsequent journal submission

utkarshresearchnetwork.in/book-service.php →

URN-R03

Biostatistics and Data Analysis

Statistical design, analysis and interpretation for clinical, community and secondary data.

- Study design and sample-size estimation
- Data cleaning, coding and analysis plans
- Regression, survival and multilevel modelling
- Secondary analysis of NFHS, LASI and GBD datasets
- Analysis in SPSS, Stata and R with publication-ready tables and figures

Suitable for: Postgraduate students, faculty, hospitals and programme teams

utkarshresearchnetwork.in/book-service.php →

URN-R04

Thesis and Dissertation Guidance

Structured methodological mentorship from synopsis to final submission.

- Topic refinement, synopsis and protocol writing
- Institutional Ethics Committee documentation
- Methodology, analysis and results chapters
- Review of the complete draft against university requirements

Suitable for: MD/MS, MPH, M.Sc., M.Phil. and PhD candidates

utkarshresearchnetwork.in/book-service.php →

URN-R05

Research Proposals, Grants and Policy Briefs

Competitive proposals for national and international funders, and evidence translated for decision-makers.

- Identification of suitable funding calls (ICMR, DST, DBT, ANRF and international agencies)
- Proposal narrative, logical framework and monitoring & evaluation plan
- Budget justification and submission documentation
- Policy briefs and evidence summaries for government and health bodies

Suitable for: Principal investigators, institutions and non-governmental organisations

utkarshresearchnetwork.in/book-service.php →

URN-R06

Clinical Research, Ethics and GCP Support

Regulatory and ethical readiness for studies involving human participants.

- Protocol and case record form development
- Ethics Committee submissions and informed consent documents
- Clinical Trials Registry – India (CTRI) registration
- Processes aligned with ICH-GCP

Suitable for: Hospitals, medical colleges and clinical investigators

utkarshresearchnetwork.in/book-service.php →

URN-R07

Research Automation and Digital Health Tools

Scripts, data platforms and digital tools that remove repetitive work from research and programme teams.

- Automated literature tracking, data cleaning and reporting workflows
- Digital data-collection forms and dashboards
- Custom tools for health workers and research programmes

Suitable for: Research groups, departments and health programmes

utkarshresearchnetwork.in/book-service.php →

II Training and Capacity Building

Practical, software-based training that participants can apply to their own research immediately.

URN-T01

Faculty and Student Development Programmes

Customised on-campus or online programmes in research methodology, evidence synthesis, biostatistics and scientific writing.

- Programmes designed around the institution's departments and research priorities
- Hands-on sessions using PRISMA, RevMan, Stata and R
- Participant certificates and post-programme support
- Includes the six-day Systematic Review and Meta-Analysis programme delivered at Ravenshaw University, Cuttack

Suitable for: Universities, medical colleges and research institutes

utkarshresearchnetwork.in →

URN-T02

Hands-on Systematic Review Workshop

An intensive two-day workshop in which participants build a systematic review from question to analysis.

- Protocol, search strategy and screening in practice
- Risk-of-bias assessment and data extraction
- Meta-analysis with forest and funnel plots

Suitable for: Researchers new to evidence synthesis

utkarshresearchnetwork.in/srma-workshop.php →

URN-T03

Systematic Review and Meta-Analysis Certification Course

A ten-session live course covering the complete systematic review workflow, with certification.

- Live instructor-led sessions with recordings and resources
- Assignments applied to the participant's own topic
- Certificate of completion

Suitable for: Faculty, clinicians and doctoral scholars

utkarshresearchnetwork.in/srma-full-course.php →

URN-T04

Systematic Review Masterclass

An introductory live session on planning and conducting a systematic review.

- Overview of the review process and reporting standards
- Common errors that lead to rejection

Suitable for: Students and early-career researchers

utkarshresearchnetwork.in/srma-training.php →

URN-T05

Research Internship Programme

Supervised, hands-on research experience on live projects.

- Systematic review and meta-analysis tracks
- Secondary data analysis using NFHS, LASI and GBD
- Mentorship and a verifiable internship certificate

Suitable for: Undergraduate and postgraduate students

utkarshresearchnetwork.in/career.php →

III

Institutional Services

Long-term arrangements for departments, universities, hospitals and publishers.

URN-I01

Institutional Research Partnerships

Memorandum-based collaboration and department-wide access to URN tools, training and research support.

- Joint research projects and publications
- Department-wide access to research platforms
- Faculty development calendars and mentorship for scholars
- Support towards accreditation and ranking research indicators

Suitable for: Universities, medical colleges and hospitals

utkarshresearchnetwork.in/srma-institutional.php →

URN-I02

Journal Setup, Training and Hosting (OJS)

Installation and configuration of Open Journal Systems, editorial team training and managed hosting.

- OJS installation, configuration and branding
- Editorial workflow and peer-review training
- Managed hosting, maintenance and backups

Suitable for: Departments, universities, societies and publishers

utkarshresearchnetwork.in/ojs-services.php →

IV

Research Platforms and Resources

Digital tools and resources developed by URN for researchers.

URN-P01

AI SRMA Suite

An AI-guided platform for conducting systematic reviews and meta-analyses to PRISMA 2020.

- Guided workflow from question to report
- Multi-database searching, screening and extraction support

Suitable for: Individual researchers and institutions

utkarshresearchnetwork.in/srma-tool.php →

URN-P02

Meta-Analysis Online

A browser-based meta-analysis calculator — no installation required.

- Forest, funnel and trial sequential analysis plots
- Heterogeneity, subgroup, meta-regression and sensitivity analysis

Suitable for: Anyone analysing pooled study data

utkarshresearchnetwork.in/meta-analysis.php →

URN-P03

SRMA Library

Locate published systematic reviews with an automatically generated PubMed search strategy.

- MeSH-based Boolean search builder
- PRISMA templates, checklists and reference standards

Suitable for: Researchers scoping a new review topic

utkarshresearchnetwork.in/srma-library.php →

URN-P04

URN Membership

Membership of the URN research network, with access to workspaces, resources and member programmes.

- Student, professional and institutional categories
- Verifiable membership certificate

Suitable for: Students, professionals and institutions

utkarshresearchnetwork.in/join-urn.php →

URN-P05

UJHSE — Utkarsh Journal of Health Sciences and Environment

An open-access, peer-reviewed journal in public health, clinical research and environmental health.

- Author guidelines and online submission
- Fee waivers available for authors from low- and middle-income countries

Suitable for: Authors in the health and environmental sciences

utkarshresearchnetwork.in/journal.php →

URN-P06

Research Resources

Guides, templates and starter kits for researchers, available without charge.

- Research starter kit and methodology guides

Suitable for: Students and early-career researchers

utkarshresearchnetwork.in/lead-magnets.php →

Engagement process

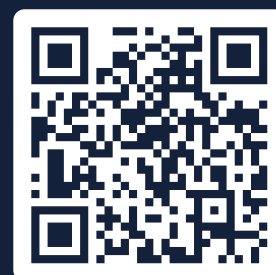

Every engagement follows the same four stages, with scope and deliverables agreed in writing.

01 Consultation A scheduled call to understand the research question, timelines and the support required.	02 Scope and proposal A written scope of work with deliverables and milestones, shared for approval.	03 Execution Work proceeds milestone by milestone, with regular review points.	04 Delivery and support Final deliverables are handed over, followed by support through revision and review.
---	--	--	--

Book a consultation

Select a convenient date and time online. The consultation is used to understand your requirements, after which a written scope of work is shared for your approval.
